

Omkar Patel

Full Stack Developer Intern Candidate

+91 90985 54677 omkarpatelhere@gmail.com Portfolio GitHub LinkedIn 
Pune, India

Profile

Full Stack Developer (Beginner) with strong fundamentals in HTML, CSS, JavaScript, Node.js, and Express.js. Experienced in building responsive web applications with real backend logic, integrating databases, and using version control with Git. A fast learner who is eager to contribute to live projects, collaborate with development teams, and grow through hands-on mentorship - exactly what this internship offers.

Education

MIT World Peace University (MIT-WPU), Pune Jun 2023 – Present
B.Tech in Computer Science Engineering (Cybersecurity) CGPA: **7.74**
Achievement: SIH (Smart India Hackathon) 2nd Round Qualifier

O.P. Jindal School, Raigarh, Chhattisgarh Mar 2008 – Jun 2022
10th: 68.8% 12th: 67.8%

Technical Skills

Frontend	HTML, CSS, JavaScript, Responsive UI Design
Backend	Node.js (Basic), Express.js (Basic), Flask
Databases	MySQL, MongoDB, SQLite
Version Control	Git, GitHub
Languages	JavaScript, Python, C++
Core Concepts	Data Structures & Algorithms, OOP, REST APIs, Problem Solving
Design / Tools	Figma, VS Code

Projects

Web-Based Image Encryption Tool Apr 2025 – May 2025
Role: Lead Developer & UX Designer
Stack: HTML, CSS, JavaScript, Python

- Built a fully responsive web application for image encryption and decryption — demonstrates end-to-end full stack thinking.
- Implemented backend encryption/decryption logic and integrated it with an interactive frontend UI.
- Reduced manual encryption time by **60%** through optimized processing and real-time user interaction.
- Focused on clean, user-friendly UI with real-time feedback — directly applicable to frontend work in live projects.

PUF-Based IoT Authentication System Aug 2025 – Oct 2025
Role: Lead Developer
Stack: ESP32, Python, Flask, HMAC-SHA256, MQTT

- Built a secure backend authentication system using Flask APIs and MQTT messaging protocol — hands-on REST API experience.
- Implemented HMAC-SHA256 for secure communication, achieving **100% authentication accuracy**.
- Collaborated with hardware (ESP32) and software layers — demonstrates ability to work across the stack.

AI-Based Carbon Emission Calculator Aug 2025 – Oct 2025
Role: UX Designer & Data Engineer
Stack: Python, Scikit-learn, Pandas

- Designed the user-facing interface and data input flows for a regression-based prediction tool.
- Performed data preprocessing and feature engineering; achieved an **R² score of 0.87**.

Competitive Programming

- Active problem solver on **Codeforces** — consistent practice in Data Structures and Algorithms.
- Experience solving problems under time constraints, building strong debugging and analytical skills.

Achievements & Activities

- **SIH 2nd Round Qualifier** — Selected through a competitive national-level hackathon at MIT-WPU.
- **PowerPoint Presentation Leader** at O.P. Jindal School — experience presenting technical ideas clearly.

Soft Skills

Communication • Team Collaboration • Adaptability • Time Management • Analytical Thinking • Problem Solving

Available for Hybrid Internship (Remote + On-site as required) · Immediate Joiner
